Subcontractor companies involved (if any):

Description of Space to be Entered

Reason for Entry into Space

Entry Plan

Under paragraph (c)(5) of 29 CFR 1910.146, alternate entry procedures may be used to enter a PRCS if the only hazard is atmospheric, and that hazard can be controlled and the space maintained safe for entry with continuous forced air ventilation.

Atmospheric hazards present in the space (either known or potential):

Atmospheric hazards will be eliminated by continuous forced air ventilation based on the following data:
