Postdoctoral Research Associate position in Experimental Particle Physics

The High Energy Physics group at the Jazan University at Jazan, Kingdom of Saudi Arabia (KSA) has an immediate opening for a Postdoctoral Research Associate position to work on the BABAR experiment.

The Jazan University is a member of the BABAR experiment and involved in various physics analyses. The department is also planning to participate in an experiment at the Large Hadron Collider at CERN and/or the BELLE II experiment in Japan.

The successful applicant will have a PhD in experimental particle physics and will be expected to make significant contributions to the BABAR analysis effort and collaboration service work. Previous flavor physics analysis experience, strong experience with Root and a very good working knowledge of C++ will make the applicant ideal. The appointment will be renewed yearly based on the mutual agreement. The successful candidate will be based in Jazan but it is possible to arrange periods of long-term re-location at SLAC in Menlo Park, California or Victoria, Canada.

Jazan University is the flagship and largest of the province of Jazan, Kingdom of Saudi Arabia. Successful candidate will receive an internationally competitive financial package including a) salary free of KSA tax b) round trip air tickets every year from/to candidate country c) housing allowance d) two months of paid summer holidays and e) maximum 2 dependents K-12 school fees.

Interested candidates are requested to provide a curriculum vita, a brief description of research interests and 3 letters of
recommendation to be sent electronically to Hossain Ahmed (hnahmed@jazanu.edu.sa) with the subject line “Postdoctoral Research Associate Position in HEP, JU”. Review of applications will begin immediately and will continue until the position is filled.
