-Vol 1

Organization	iii
Monday, August 21, 2000	
Invited Talks	
MO101	No Paper Available
MO102	SLC Final Performance and Lessons 1 <i>Nan Phinney, SLAC</i>
MO201	CLIC: A Two-Beam Multi-Tev e^{\pm} Linear Collider 6 <i>Jean-Pierre Delahaye, CERN</i>
MO202	TESLA Linear Collider Design and R&D Status 11 <i>Reinhard Brinkmann, DESY</i>
MO203	Progress in the Next Linear Collider Design..... 16 <i>Tor Raubenheimer, SLAC</i>
MO204	JLC Progress 21 <i>Nobu Toge, KEK</i>
MO301	New Developments in Linear Colliders Final Focus Systems..... 26 <i>Pantaleo Raimondi, SLAC</i>

Posters

MOA01	Theory and Suppression of Multibunch Beam Breakup in Linear Colliders	31
	<i>Courtlandt Bohn, Fermilab</i>	
MOA02	Simulations of an Intra-Pulse Interaction Point Feedback for Future Linear Colliders...	34
	<i>Daniel Schulte, CERN</i>	
MOA03	Beam Dynamics Simulation for the CTF3 Drive-Beam Accelerator	37
	<i>Daniel Schulte, CERN</i>	
MOA04	Beam Loading Compensation in the Main Linac of CLIC	41
	<i>Daniel Schulte, CERN</i>	
MOA05	A Low Charge Demonstration of Electron Pulse Compression for the CLIC RF Power Source.....	44
	<i>Roberto Corsini, CERN</i>	
MOA06	Single Pulse Damage in Copper	47
	<i>Marc Ross, SLAC</i>	
MOA07	Quadrupole Centering and Beam Steering in the Next Linear Collider Main Linacs....	50
	<i>Peter Tenenbaum, SLAC</i>	
MOA08	Studies of Beam Optics and Scattering in the Next Linear Collider Post-Linac Collimation System.....	53
	<i>Peter Tenenbaum, SLAC</i>	
MOA09	Direct Measurement of Geometric Wakefields from Tapered Rectangular Collimators.....	56
	<i>Peter Tenenbaum, SLAC</i>	
MOA10	Advanced Collimator Systems for the NLC	59
	<i>Josef Frisch, SLAC</i>	
MOA11	Investigations of Slow Motions of the SLAC Linac Tunnel	62
	<i>Andrei Seryi, SLAC</i>	
MOA12	Ground Motion Studies and Modeling for the Interaction Region of a Linear Collider	65
	<i>Andrei Seryi, SLAC</i>	
MOA13	Ground Motion Model of the SLAC Site.....	68
	<i>Andrei Seryi, SLAC</i>	
MOA14	Simulation Studies of the NLC with Improved Ground Motion Models	71
	<i>Andrei Seryi, SLAC</i>	
MOA15	Beam-Based Feedback Simulations for the NLC Linac	74
	<i>Linda Hendrickson, SLAC</i>	
MOA16	Double Kicker System in ATF	77
	<i>Takayuki Imai, KEK</i>	
MOA17	Estimates of Dispersive Effects in a Bent NLC Main Linac	80
	<i>Michael Syphers, FNAL</i>	

MOA18	CDS Structure for the Normal Conducting Accelerating Cavities in TESLA Linear Collider.....	83
	<i>Valentin Paramonov, INR</i>	
MOA19	Large-Scale Simulation of Beam Dynamics in High Intensity Ion Linacs Using Parallel Supercomputers	86
	<i>Robert D. Ryne, LANL</i>	
MOA20	A Second Order Stochastic Leap-Frog Algorithm for Langevin Simulation	89
	<i>Ji Qiang, LANL</i>	
MOA21	Impedance of a Beam Tube with Small Corrugations	92
	<i>Karl Bane, SLAC</i>	
MOB01	Design Studies for a High Current Bunching System for CLIC Test Facility (CTF3) Drive Beam	95
	<i>Joel Le Duff, LAL</i>	
MOB02	An Injector for the CLIC Test Facility (CTF3).....	98
	<i>Louis Rinolfi, CERN</i>	
MOB03	No Paper Available	
MOB04	No Paper Available	
MOB05	Development of the Electron Gun for the JNC High-Power Linac	101
	<i>Yoshio Yamazaki, KEK</i>	
MOB06	Emittance Measurements at the A0 Photoinjector	104
	<i>Jean-Paul Carneiro, FNAL</i>	
MOB07	The FaBrE Project at Trieste.....	107
	<i>Gerardo D'Auria, Sincrotrone Trieste</i>	
MOB08	Production and Studies of Photocathodes for High Intensity Electron Beams	110
	<i>Heiko Trautner, CERN</i>	
MOB09	The SPEAR Injector RF Gun and Linac Performance	113
	<i>Sam Park, SLAC</i>	
MOB10	No Paper Available	
MOB11	Development of a Novel Superconducting RF Photocathode Electron Gun	116
	<i>Michael Cole, Advanced Energy Systems</i>	
MOB12	Thermal Structural Analysis of an SCRF Photocathode Electron Gun Cavity.....	119
	<i>Thomas Schultheiss, Advanced Energy Systems</i>	
MOB13	The Flat Beam Experiment at the FNAL Photoinjector	122
	<i>Don Edwards, FNAL</i>	
MOB14	Setting and Measuring the Longitudinal Optics in CEBAF Injector	125
	<i>Reza Kazimi, TJNAF</i>	

MOB15	Initial Results of the New High Intensity Electron Gun at the Argonne Wakefield Accelerator <i>Manoel Conde, ANL</i>	128
MOB16	Compression of High-Charge Electron Bunches..... <i>Michael Fitch, FNAL</i>	131
MOB17	Use of Coherent Transition Radiation to Set Up the APS RF Thermionic Gun to Produce High-Brightness Beams for SASE FEL Experiments <i>Nicholas Sereno, ANL</i>	134
MOB18	2.856-GHz Modulation of Conventional Triode Electron Gun..... <i>Sung-Ju Park, POSTECH</i>	137
MOB19	No Paper Available	
MOB20	High-Intensity Single-Bunch Electron Beam Generation with the 38 MeV L-Band Linac in Osaka University..... <i>Shuichi Okuda, Osaka University</i>	140
MOB21	Experimental Determination of the Characteristics of a Positron Source Using Channeling <i>Robert Chehab, LAL-IN2P3 (CNRS)</i>	143
MOC01	Wire Scanners for Small Emittance Beam Measurement in ATF <i>Hitoshi Hayano, KEK</i>	146
MOC02	No Paper Available	
MOC03	Photoelectron Beam Longitudinal Phase Space Tomography Studies at the ATF <i>Shigeru Kashiwagi, Waseda Univ.</i>	149
MOC04	Latest Developments from the S-DALINAC <i>Bernd Schweizer, Darmstadt University of Technology</i>	152
MOC05	Electro-Optic Sampling of Transient Fields From the Passage of High-Charge Electron Bunches..... <i>Michael Fitch, FNAL</i>	155
MOC06	Characterization of Ce-Doped Scintillating Crystals for Imaging Electron Beams at the APS Linac <i>William Berg, ANL</i>	158
MOC07	Elliptical X-Ray Spot Measurement <i>Roger Richardson, LLNL</i>	161
MOC08	Measurements of RF Cavity Voltages by X-Ray Spectrum Measurements..... <i>David Findlay, Rutherford Appleton Laboratory</i>	164
MOC09	Measurement of the Six-Dimensional Phase Space at the New GSI High-Current Linac <i>Peter Forck, GSI</i>	166

MOC10	Measurement of Temporal Response of Ferroelectric Photocathodes	169
	<i>Franco Tazzioli, INFN</i>	
MOC11	Beam Position-Phase Monitors for SNS Linac	172
	<i>Sergey Kurennoy, LANL</i>	
MOC12	SNS Front End Diagnostics	175
	<i>Larry Doolittle, LBNL</i>	
MOC13	Space Charge Effects in Bunch Shape Monitors	178
	<i>Alexander Feschenko, INR, Moscow</i>	
MOC14	Intense Proton Core and Halo Beam Profile Measurement: Beam Line Component Mechanical Design	181
	<i>Robert Valdiviez, LANL</i>	
MOC15	Beam Diagnostics Instrumentation for a 6.7-MeV Proton Beam Halo Experiment.....	184
	<i>J. Douglas Gilpatrick, LANL</i>	
MOC16	Optical Transition Radiation (OTR) Measurements of an Intense Pulsed Electron Beam	187
	<i>Christophe Vermare, LANL</i>	
MOC17	A BPM System for the SPring-8 Linac	190
	<i>Kenichi Yanagida, JASRI</i>	
MOC18	A Real-Time Energy Monitor System for the IPNS Linac.....	193
	<i>Jeffrey Dooling, ANL</i>	
MOC19	Measurement and Correction of Cross-Plane Coupling in Transport Lines.....	196
	<i>Mark Woodley, SLAC</i>	
MOC20	Numerical Analysis of a Beam-Energy-Spread Monitor Using Multi-Stripline Electrodes.....	199
	<i>Tsuyoshi Suwada, KEK</i>	
MOD01	Heavy Ion Beam Acceleration of Two-Charge States from an ECR Ion Source.....	202
	<i>Peter Ostroumov, ANL</i>	
MOD02	Multiple Charge State Beam Acceleration at ATLAS.....	205
	<i>Peter Ostroumov, ANL</i>	
MOD03	Status Report on the Construction of the ISAC Drift Tube Linac.....	208
	<i>Pierre Bricault, TRIUMF</i>	
MOD04	A Charge State Breeder Based on a Low Frequency RFQ for the ISAC Accelerator Complex.....	211
	<i>Pierre Bricault, TRIUMF</i>	
MOD05	Ion Sources and Injectors for HIF Induction Linacs	214
	<i>Enrique Henestroza, LBNL</i>	
MOD06	The Status of DESY H ⁻ Sources	217
	<i>Jens Peters, DESY</i>	

MOD07	An ECR Hydrogen Negative Ion Source at CEA/Saclay: Preliminary Results 220 <i>Raphael Gobin, CEA-Saclay</i>
MOD08	No Paper Available
MOD09	Measurements on the H ⁻ Ion Source and Low Energy Beam Transport Section for the SNS Front-End Systems 223 <i>Rainer Thoma, LBNL</i>
MOD10	Design of the 7-MeV/u, 217-MHz Injector Linac for the Proposed Ion Beam Facility for Cancer Therapy at the Clinic in Heidelberg 226 <i>Bernhard Schlitt, GSI</i>
MOD11	Commissioning of IH-RFQ and IH-DTL for the GSI High-Current Linac..... 229 <i>Ulrich Ratzinger, GSI Darmstadt, Germany</i>
MOD12	Operational Aspects of the High Current Upgrade at the UNILAC 232 <i>Juergen Klabunde, GSI</i>
MOD13	The New Gas Stripper and Charge State Separator of the GSI High-Current Injector . 235 <i>Winfried Barth, GSI</i>
MOD14	Commissioning of the High Current Ion Sources at the New GSI Injector (HSI) 238 <i>Hartmut Reich, GSI</i>
MOD15	The Low Energy Beam Transport System of the New GSI High-Current Injector 241 <i>Ludwig Dahl, GSI</i>
MOD16	First Beam Test with the ISAC Separated Function DTL 244 <i>Robert Laxdal, TRIUMF</i>
MOD17	ISAC at TRIUMF: Recent Achievements and Future Goals 247 <i>Robert Laxdal, TRIUMF</i>
MOD18	Design of the SNS MEBT 250 <i>John Staples, LBNL</i>
MOD19	Evolution of the LEBT Layout for SNS 253 <i>Jani Reijonen, LBNL</i>
MOD20	First Beam Test of a Volume Production H ⁻ Ion Source with a LEBT 256 <i>Akira Ueno, KEK</i>
MOD21	IHEP Experience on Creation and Operation of RFQs..... 259 <i>A. Zherebtsov, IHEP</i>
MOE01	Analysis and Simulation on the Enhancement of the CSR Effects 262 <i>Rui Li, Jefferson Lab</i>
MOE02	Short High Charge Bunches in the SLAC Linac 266 <i>Franz-Josef Decker, SLAC</i>
MOE03	Quadrupole Misalignments and Steering in Long Linacs..... 269 <i>Gennady Stupakov, SLAC</i>

MOE04	Suppression of Beam Breakup Instability in a Long Train by Introducing Energy Spread Between the Bunches 272 <i>Gennady Stupakov, SLAC</i>
MOE05	Optimized Wakefield Computations Using a Network Model 275 <i>Jean-Francois Ostiguy, FNL</i>
MOE06	The Diffraction Model And Its Applicability for Wakefield Calculations..... 278 <i>Wolfgang F.O. Mueller, U. Frankfurt</i>
MOE07	Lattice Matching with a Quadrupole Missing..... 281 <i>Rainer Wanzenberg, DESY</i>
MOE08	Transient Beam Loading Compensation in Low-Energy Pulsed Linear Electron Accelerators..... 284 <i>Wim Mondelaers, Department of Subatomic Radiation Physics, Ghent University</i>
MOE09	No Paper Available
MOE10	Experimental Study of System for a Simultaneous Bend of Unidirectional Electron and Proton Beams..... 287 <i>Alexander Nesterovich, Moscow Engineering Physics Institute</i>
MOE11	Emittance Growth from the Thermalization of Space Charge Nonuniformities..... 290 <i>Steven Lund, LLNL</i>
MOE12	Envelope Modes of Beams with Angular Momentum..... 293 <i>John Barnard, LLNL</i>
MOE13	Investigation of Halo Formation in Continuous Beams Using Weighted Polynomial Expansion and Perturbational Analysis 297 <i>Christopher Allen, LANL</i>
MOE14	Multiscale Analysis of RMS Envelope Dynamics..... 300 <i>Michael Zeitlin, IPME RAS</i>
MOE15	Multiresolution Representations for Solutions of Vlasov-Maxwell-Poisson Equations 303 <i>Antonina Fedorova, IPME RAS</i>
MOE16	Some New Approaches to Solving Constrained Transfer Line Matching Problems..... 306 <i>George Gillespie, G.H. Gillespie Associates</i>
MOE17	Self-Consistent Model of Three-Dimensional Time-Dependent Ellipsoid..... 309 <i>Yuri Batygin, American Sciences and Engineering</i>
MOE18	High-Brightness Beam Current Limit in RF Field 312 <i>Yuri Batygin, American Sciences and Engineering</i>
MOE19	Energy Transfer Mechanisms and Equipartitioning in Non-Equilibrium Space-Charge-Dominated Beams 315 <i>Rami Kishek, Institute for Plasma Research, U. Maryland</i>
MOE20	DFQ–Double Frequency RFQ 318 <i>Yoshihisa Iwashita, Institute for Chemical Research</i>
MOE21	No Paper Available

Tuesday, August 22, 2000**Invited Talks**

TU101	An Overview of the Spallation Neutron Source Project.....	321
	<i>Robert Kustom, ORNL</i>	
TU102	The KEK/JAERI Joint Project: Status of Design and Development	326
	<i>Kazuo Hasegawa, JAERI</i>	
TU103	RIA Project	331
	<i>Christoph Leemann, Jefferson Lab</i>	
TU201	High Power Operations of LEDA	336
	<i>Lloyd Young, LANL</i>	
TU202	Beam Halo in Proton Linac Beams	341
	<i>Thomas Wangler, LANL</i>	
TU203	Exotic Ion Beams, Targets and Sources	346
	<i>Jacques Lettry, CERN</i>	
TU204	Test Measurements with the REX-ISOLDE Linac Structures	351
	<i>Oliver Kester, LMU Munich</i>	
TU205	PIAVE the Legnaro New Positive Ion Injector Based on Superconducting RFQs	356
	<i>Augusto Lombardi, INFN</i>	
TU206	A High Intensity H ⁻ Linac at CERN Based on LEP-2 Cavities.....	361
	<i>Maurizio Vretenar, CERN</i>	
TU301	Accelerator Structures for Linear Colliders.....	366
	<i>Roger H. Miller, SLAC</i>	

Posters

TUA01	Fabrication Process of Rounded Damped Detuned Structure	371
	<i>Yoshisato Funahashi, KEK</i>	
TUA02	Meeting Tight Frequency Requirement of Rounded Damped Detuned Structure	374
	<i>Toshiyasu Higo, KEK</i>	
TUA03	Design, Fabrication, and Measurement of the First Rounded Damped Detuned Accelerator Structure (RDDS1)	377
	<i>Juwen Wang, SLAC</i>	
TUA04	Design of the JLC/NLC RDDS Structure Using Parallel Eigensolver Omega3P	380
	<i>Zenghai Li, SLAC</i>	
TUA05	Numerical Studies on Locally Damped Structures	383
	<i>Zenghai Li, SLAC</i>	
TUA06	Dipole Mode Detuning in the NLC Injector Linacs	386
	<i>Karl Bane, SLAC</i>	

TUA07	Fabrication and Tolerance Issues and Their Influence on Multibunch BBU and Emittance Dilution in the Construction of X-Band RDDS Linacs for the NLC 389 <i>Roger Jones, SLAC</i>
TUA08	Comparisons of Equivalent Circuit Predictions with Measurements for Short Stacks of RDDS1 Discs, and Their Potential Application to Improved Wakefield Prediction 392 <i>Roger Jones, SLAC</i>
TUA09	Local and Fundamental Mode Coupler Damping of the Transverse Wakefield in RDDS1 Linacs 395 <i>Roger Jones, SLAC</i>
TUA10	An Investigation of Optimized Frequency Distributions for Damping Wakefields in X-Band Linacs for the NLC 398 <i>Roger Jones, SLAC</i>
TUA11	General Relations for Mode Parameters of Compensated Structures in the Vicinity of Operating Point 401 <i>Valentin Paramonov, INR</i>
TUA12	The Compensated Periodical Structure RF Deflector 404 <i>Valentin Paramonov, INR</i>
TUA13	Rectangular Waveguide HOM Couplers for a TESLA Superstructure 407 <i>Nicolay Sobenin, MEPhI, Russia</i>
TUA14	A Fast Switchyard for the TESLA FEL-Beam Using a Superconducting Transverse Mode Cavity 410 <i>Rainer Wanzenberg, DESY</i>
TUA15	Superconducting Superstructure for the TESLA Collider: New Results 413 <i>Matthias Liepe, DESY</i>
TUA16	Design of a 3-GHz Accelerator Structure for the CLIC Test Facility (CTF 3) Drive Beam 416 <i>Erk Jensen, CERN</i>
TUA17	The CLIC Main Linac Accelerating Structure 419 <i>Walter Wuensch, CERN</i>
TUA18	Higher Dipole Bands in the NLC Accelerating Structure 422 <i>Valery Dolgashev, SLAC</i>
TUA19	No Paper Available
TUA20	Microwave Quality Assurance for Single Cells of the Next Linear Collider 425 <i>Roger H. Miller, SLAC</i>
TUA21	Test of Accelerating Structure for VEPP-5 Preinjector 428 <i>Viatcheslav Pavlov, BINP</i>
TUA22	High Power Model Fabrication of Biperiodic L-Support Disk-and-Washer Structure 431 <i>Yoshihisa Iwashita, Institute for Chemical Research</i>

TUB01	No Paper Available	
TUB02	No Paper Available	
TUB03	The DARHT-II Electron Injector.....	434
	<i>Enrique Henestroza, LBNL</i>	
TUB04	Design and Construction of the 3.2-MeV Cathode Assembly for DARHT II.....	437
	<i>Craig Peters, LBNL</i>	
TUB05	Design and Construction of the 3.2- MeV Cathode Assembly for DARHT-II.....	440
	<i>Craig Peters, LBNL</i>	
TUB06	Electron Beam 3.5MV, 2kA Injector Diode Diagnostics for the DARHT Facility	443
	<i>Shmuel Eylon, LBNL</i>	
TUB07	Design and Performance of the DARHT Second Axis Induction Cells and Drivers	446
	<i>William Waldron, LBNL</i>	
TUB08	The DARHT Phase 2 Linac	449
	<i>Henry Rutkowski, LBNL</i>	
TUB09	RF Cell Modeling and Experiments for Wakefield Minimization in DARHT-II	452
	<i>Scott Nelson, LLNL</i>	
TUB10	Reconstruction of Initial Beam Conditions at the Exit of the DARHT II Accelerator ..	455
	<i>Arthur Paul, LLNL</i>	
TUB11	Effect of Backscattered Electrons on Electron Beam Focus	458
	<i>Steven Falabella, LLNL</i>	
TUB12	The Effect of Asymmetric Plasma Plumes on the Transport of High-Current Electron Beams.....	461
	<i>James McCarrick, LLNL</i>	
TUB13	Beam-Target Interaction Experiments For Bremsstrahlung Converters Applications ...	464
	<i>S. Sampayan, LLNL</i>	
TUB14	Faraday Cup Measurements of Ions Backstreaming into an Electron Beam Impinging on a Plasma Plume	467
	<i>Tim Houck, LLNL</i>	
TUB15	The RTA Betatron-Node Experiment: Limiting Cumulative BBU Growth In A Linear Periodic System	470
	<i>Tim Houck, LLNL</i>	
TUB16	The Mechanical Design for the DARHT- II Downstream Beam Transport Line.....	473
	<i>Glen Westenskow, LLNL</i>	
TUB17	Particle Simulation of DARHT-II Downstream Transport.....	476
	<i>Brian Poole, LLNL</i>	
TUB18	Particle Simulations of a Long Pulse Electron Beam in a Bend	479
	<i>Brian Poole, LLNL</i>	

TUB19	Physics Design of the ETA- II/Snowtron Double Pulse Target Experiment 482 <i>Yu-Jiuan Chen, LLNL</i>
TUB20	Physics Design Considerations of Diagnostic X Beam Transport System 485 <i>Yu-Jiuan Chen, LLNL</i>
TUC01	RBF Neural Net-Based Classifier for the AIRIX Accelerator Fault Diagnosis..... 488 <i>Jean Christophe Ribes, CEA</i>
TUC02	First Results of the AIRIX Induction Accelerator 491 <i>Marc Mouillet, CEA</i>
TUC03	Transport Optimization and Characterization of the 2kA AIRIX Electron Beam 494 <i>Eric Merle, CEA</i>
TUC04	No Paper Available
TUC05	A New Linear Inductive Voltage Adder Driver for the Saturn Accelerator..... 497 <i>Michael G. Mazarakis, Sandia National Labs</i>
TUC06	Ion-Hose Instability in Long Pulse Induction Accelerators 500 <i>George Caporaso, LLNL</i>
TUC07	The Effect of an Under-Dense Plasma Density Gradient on the Backstreaming Ion Mechanism 503 <i>George Caporaso, LLNL</i>
TUC08	Dipole Septum Magnet in the Fast Kicker System for Multi-Axis Advanced Radiography 506 <i>Li-Fang Wang, LLNL</i>
TUC09	Modeling of an Inductive Adder Kicker Pulser For DARHT-II 509 <i>Li-Fang Wang, LLNL</i>
TUC10	Inductive Adder Kicker Modulator for DARHT-II 512 <i>Edward Cook, LLNL</i>
TUC11	Beam-Based Feedback Testing and Simulations for the SLC Linac 515 <i>Linda Hendrickson, SLAC</i>
TUC12	RF Control Requirements for the CEBAF Energy Upgrade Cavities 518 <i>Curt Hovater, TJNAF</i>
TUC13	SNS Superconducting Cavity Modeling: Iterative Learning Control 521 <i>Sung-il Kwon, LANL</i>
TUC14	Automated Operation of the APS Linac Using the Procedure Execution Manager 524 <i>Stanley Pasky, ANL</i>
TUC15	Control System for the LEDA 7-MeV Proton Beam Halo Experiment 527 <i>Martin Pieck, LANL</i>
TUC16	Analysis and Synthesis of the SNS Superconducting RF Control System 531 <i>Yi-Ming Wang, LANL</i>

TUC17	Design of the SNS Normalconducting Linac RF Control System 534 <i>T.S. Rohlev, LANL</i>
TUC18	RF Control System for the NLC Linacs 537 <i>Paul Corredoura, SLAC</i>
TUC19	Frequency Response Measurements of LEDA RF Control System 540 <i>T.S. Rohlev, LANL</i>
TUD01	A 3.0MeV KOMAC/KTF RFQ Linac 542 <i>Jang-Min Han, Korea Atomic Energy Research Institute</i>
TUD02	RF Test of a 324-MHz, 3-MeV, H ⁻ RFQ Stabilized with PISL's 545 <i>Akira Ueno, KEK</i>
TUD03	Design of the ESS RFQs and Chopping Line 548 <i>Robin Ferdinand, CEA</i>
TUD04	Status Report on the 5-MeV IPHI RFQ 551 <i>Robin Ferdinand, CEA</i>
TUD05	RFQD: A 'Decelerating' Radiofrequency Quadrupole for the CERN Antiproton Facility..... 554 <i>Werner PirkI, CERN</i>
TUD06	Overview of the APT Accelerator Design 557 <i>Joseph Tooker, General Atomics</i>
TUD07	The Construction of the Low-Energy Front 60-MeV Linac for the JAERI/KEK Joint Project..... 560 <i>Yoshishige Yamazaki, KEK</i>
TUD08	Development of the 50-MeV DTL for the JAERI/KEK Joint Project 563 <i>Fujio Naito, KEK</i>
TUD09	Development of Superconducting linac for the KEK/JAERI Joint Project 566 <i>Motoharu Mizumoto, JAERI</i>
TUD10	Development of a DTL Quadrupole Magnet with a New Electroformed Hollow Coil for the JAERI/KEK Joint Project 569 <i>Kazuo Yoshino, KEK</i>
TUD11	High Power Proton Linacs for Different Applications 572 <i>Boris Murin, Moscow Radiotechnical Institute</i>
TUD12	Beam Emittance Measurements for the Low-Energy Demonstration Accelerator Radiofrequency Quadrupole..... 575 <i>Martin E. Schulze, LANL</i>
TUD13	LEDA: A High-Power Test Bed of Innovation and Opportunity 578 <i>J. David Schneider, LANL</i>
TUD14	Status Report on the Low-Energy Demonstration Accelerator (LEDA) 581 <i>H. Vernon Smith, LANL</i>

TUD15	LEDA Beam Operations Milestone and Observed Beam Transmission Characteristics.....	584
	<i>Lawrence Rybarczyk, LANL</i>	
TUD16	High Current Proton Tests of the Fermilab Linac	587
	<i>Milorad Popovic, FNAL</i>	
TUD17	Tests of the CERN Proton Linac Performance for LHC-Type Beams	590
	<i>Richard Scrivens, CERN</i>	
TUD18	A Superconducting Linac Injector for the BNL AGS.....	593
	<i>Alessandro G Ruggiero, BNL</i>	
TUD19	A Superconducting Linac Driver for the HFBR.....	596
	<i>Alessandro G Ruggiero, BNL</i>	
TUD20	Reliability History and Improvements to the ANL 50-MeV H ⁻ Accelerator	599
	<i>Lawrence Donley, ANL</i>	
TUD21	Development of the Low Energy Accelerator for KOMAC.....	602
	<i>Byung-Ho Choi, Korea Atomic Energy Research Institute</i>	
TUD22	Superconducting Linac for the SNS	605
	<i>J. Stovall, LANL</i>	
TUE01	RF Processing of X-Band Accelerator Structures at the NLCTA.....	608
	<i>Chris Adolphsen, SLAC</i>	
TUE02	No Paper Available	
TUE03	Acoustic Measurement of RF Breakdown in High-Gradient RF Structures.....	611
	<i>Josef Frisch, SLAC</i>	
TUE04	Applications of Time Domain Simulation to Coupler Design for Periodic Structures .	614
	<i>Norman Kroll, SLAC</i>	
TUE05	A Plasma Model for RF Breakdown in Accelerator Structures	618
	<i>Perry Wilson, SLAC</i>	
TUE06	Pulsed Neutron Source using 100-MeV Electron Linac at Pohang Accelerator Laboratory.....	621
	<i>Won Namkung, POSTECH</i>	
TUE07	Stretcher Operation of the 100-MeV Disc-Load Electron Linac at ICR, Kyoto University	624
	<i>Akira Noda, Institute for Chemical Research</i>	
TUE08	Status of the SPring-8 Linac	627
	<i>Kenichi Yanagida, JASRI</i>	
TUE09	Towards Reliable Acceleration of High-Energy and High-Intensity Electron Beams.....	630
	<i>Kazuro Furukawa, KEK</i>	

TUE10	Beam Switching and Beam Feedback Systems at KEKB Linac.....	633
	<i>Kazuro Furukawa, KEK</i>	
TUE11	Linac LUE200: First Testing Results.....	636
	<i>Anatoli Soumbaev, SOUMBAEV, FrankLab, JINR</i>	
TUE12	NPK LUTS Project of Contraband Detection System	639
	<i>Yuri Svistunov, D.V. Efremov Institute</i>	
TUE13	Experiments on Material Recognition for 8-MeV Customs Inspection System for Trucks and Large-Scale Containers	642
	<i>Michael Vorogushin, D.V. Efremov Institute</i>	
TUE14	Critical Analysis of Industrial Electron Linacs.....	645
	<i>Sergey Korenev, STERIS Isomedix Services</i>	
TUE15	Commissioning of the 100-MeV Swiss Light Source Injector Linac	648
	<i>C. Piel, ACCEL Instruments GmbH</i>	
TUE16	Concept of Staged Approach for International Fusion Materials Irradiation Facility ...	651
	<i>Masayoshi Sugimoto, Japan Atomic Energy Research Institute</i>	
TUE17	Status of the HIMAC Injector	654
	<i>Yukio Sato, National Institute of Radiological Sciences</i>	
TUE18	No Paper Available	
TUE19	No Paper Available	
TUE20	No Paper Available

Table of Contents

-Vol 2

Organization	iii
Wednesday, August 23, 2000	
Invited Talks	
WE100	Dan Birx Memorial Session 657 <i>Richard Briggs, SAIC</i>
WE101	Progress in Induction Linacs 658 <i>George Caporaso, LLNL</i>
WE102	No Paper Available
WE103	Review of Solid-State Modulators 663 <i>Edward Cook, LLNL</i>
WE201	No Paper Available
WE202	Overview of the Heavy Ion Fusion Program 668 <i>C.M. Celata, LBNL</i>
WE203	New Development in RF Pulse Compression..... 673 <i>Sami Tantawi, SLAC</i>
WE204	Pulsed Superconductivity Acceleration..... 678 <i>Matthias Liepe, DESY</i>

WE205	Pulsed SC Proton Linac 683 <i>N. Ouchi, JAERI</i>
--------------	--

Thursday, August 24, 2000

Invited Talks

TH101	Highlights of AAC 2000 Workshop..... 688 <i>J. Rosenzweig, UCLA</i>
TH102	Acceleration for the Muon Storage Ring Neutrino Source 691 <i>David Neuffer, FNAL</i>
TH103	Overview of SASE Experiments..... 696 <i>Pedro Castro, DESY</i>
TH201	All-Optical Accelerator Experiments at LBNL 701 <i>Wim Leemans, LBNL</i>
TH202	E-157: a Plasma Wakefield Acceleration Experiment 706 <i>Patrick Muggli, USC</i>
TH203	Simulation of the Ionization Cooling of Muons in Linear RF Systems 711 <i>Gregg Penn, LBNL</i>
TH204	The Jefferson Lab 1 kW IR FEL 716 <i>David Douglas, TJNAF</i>
TH205	Measuring and Controlling the Energy Spread in CEBAF 721 <i>Geoffrey Krafft, TJNAF</i>
TH206	Coherent Synchrotron Radiation Measurements in the CLIC Test Facility (CFT2) 726 <i>Roberto Corsini, CERN</i>
TH301	RAFEL 731 <i>Dinh Nguyen, LANL</i>

Posters

THA01	No Paper Available
THA02	High Power Testing Results of the X- Band Mixed-Mode RF Windows for Linear Colliders 736 <i>Shu-ichi Tokumoto, KEK</i>
THA03	The Next Linear Collider Klystron Development Program 739 <i>Erik Jongewaard, SLAC</i>
THA04	Development of RF Reference Line for the Linear Collider 742 <i>Takashi Naito, KEK</i>
THA05	The RF Phase Distribution and Timing System for the NLC 745 <i>Josef Frisch, SLAC</i>

THA06	2-D Simulation of High-Efficiency Cross-Field RF Power Sources 748 <i>Valery Dolgashev, SLAC</i>
THA07	Development of High Power X-Band Semiconductor RF Switch for Pulse Compression Systems of Future Linear Colliders 751 <i>Fumihiko Tamura, SLAC</i>
THA08	A Planar, Rectangular Waveguide Launcher and Extractor for a Dual-Moded RF Power Distribution System 754 <i>Christopher Nantista, SLAC</i>
THA09	An Alternate Dual-Moded DLDS Utilizing the TE ₀₁ and TE ₀₂ Modes 757 <i>Christopher Nantista, SLAC</i>
THA10	No Paper Available
THA11	Energy stabilization of 1.5-GeV S-Band linac 760 <i>Masao Kuriki, KEK</i>
THA12	Development of a Smart Modulator and Efficiency Evaluation of 500 GeV e ⁺ e ⁻ C-Band Linear Collider 763 <i>Jong-Seok Oh, KEK</i>
THA13	Solid State Induction Modulator Replacement for the Conventional SLAC 5045 Klystrons Modulator 766 <i>Richard Cassel, SLAC</i>
THA14	Improvement of Waveform Efficiency Using a Compensation Circuit 769 <i>Mitsuo Akemoto, KEK</i>
THA15	Analyses of Klystron Modulator Approaches for NLC 772 <i>Anatoly Krasnykh, SLAC</i>
THA16	SLAC Parallel Tracking Code Development and Applications 775 <i>B. McCandless, SLAC</i>
THA17	No Paper Available
THA18	Results of an RF-Pulsed Heating Experiment at SLAC 779 <i>David Pritzkau, SLAC</i>
THA19	A New Configuration for Two-Beam Linear Colliders 782 <i>R. Ruth, SLAC</i>
THA20	Design for a One-Gigawatt, Annular-Beam Klystron 785 <i>M.V. Fazio, LANL</i>
THB01	A 'Hybrid'-Type System for an Achromatic Focusing of Ions 788 <i>Alexander Nesterovich, Moscow Engineering Physics Institute</i>
THB02	Funneling with the Two-Beam RFQ 791 <i>Holger Zimmermann, IAP, Frankfurt</i>

THB03	High Current Beam Dynamics in an ESS Superconducting Linac	794
	<i>Michael Pabst, F-Z Juelich</i>	
THB04	Study of Nonlinearities and Small Particle Losses in High Power Linac	797
	<i>Stepan Yaramishev, ITEP</i>	
THB05	Influence of Space Charge Fluctuations on Low Energy Beam Transport of High Current Ion Beams	800
	<i>Juergen Pozimski, IAP, Frankfurt</i>	
THB06	Beam Dynamics Studies for a High Current Ion Injector	803
	<i>Horst Deitinghoff, IAP, Frankfurt</i>	
THB07	The Beam Halo Experiment at LEDA.....	806
	<i>Patrick L. Colestock, LANL</i>	
THB08	Determining Phase-Space Properties of the LEDA RFQ Output Beam	809
	<i>Walter Lysenko, LANL</i>	
THB09	Beam Energy Stabilization of the KEK 40-MeV Proton Linac	812
	<i>Zenei Igarashi, KEK</i>	
THB10	Energy Stability in a High Intensity Pulsed SC Proton Linac	815
	<i>Alban Mosnier, CEA</i>	
THB11	RFQ Parameter Choice by Multi-Parameter Optimization	818
	<i>Alexander Durkin, Moscow Radiotechnical Institute</i>	
THB12	Multipactoring Code for 3-D Accelerating Structures.....	821
	<i>Leonid Kravchuk, INR, Moscow</i>	
THB13	Using Trace 3-D in the Particle Beam Optics Laboratory (PBO Lab).....	824
	<i>Barrey Hill, G.H. Gillespie Assoc.</i>	
THB14	CCT: A Code to Automate the Design of Coupled Cavities.....	827
	<i>Peter D. Smith, General Atomics</i>	
THB15	New Tasks and New Codes for RFQ Beam Simulation.....	830
	<i>Boris Bondarev, Moscow Radiotechnical Institute</i>	
THB16	Design and Performance Simulations of the Bunch Compressor for the APS LEUTL FEL.....	833
	<i>Michael Borland, ANL</i>	
THB17	No Paper Available	
THB18	Beam Dynamics On-Line Simulation.....	836
	<i>Mikhail Krassilnikov, Darmstadt University of Technology</i>	
THB19	TOUTATIS, the CEA/Saclay RFQ Code.....	839
	<i>Robin Ferdinand, CEA</i>	
THB20	Improvement in 3-D Computation of RF Losses in Resonant Cavities.....	842
	<i>Pascal Balleyguier, CEA</i>	

THB21	The Method for the Fields Distribution Description in Periodical Structures.....	845
	<i>Valentin Paramonov, INR</i>	
THB22	Observation of a H ⁻ Beam Ion Instability.....	848
	<i>Milorad Popovic, FNAL</i>	
THC01	Wakefield Effects in the Advanced Photon Source Linac.....	851
	<i>Eliane Lessner, ANL</i>	
THC02	The JAERI Superconducting Linac-Based FEL.....	854
	<i>Toshiyuki Shizuma, JAERI</i>	
THC03	Driver Accelerator Design for the 10-kW Upgrade of the Jefferson Lab IR FEL.....	857
	<i>David Douglas, TJNAF</i>	
THC04	Specifying HOM-Power Extraction Efficiency in High-Average Current, Short-Bunch Length SRF Environment.....	860
	<i>Lia Merminga, TJNAF</i>	
THC05	A Highly Flexible Bunch Compressor for the APS LEUTL FEL.....	863
	<i>Michael Borland, ANL</i>	
THC06	2-GeV Superconducting Muon Linac.....	866
	<i>Milorad Popovic, FNAL</i>	
THC07	The FEL Driven Two-Beam Accelerator Studies at CESTA.....	869
	<i>Jean-Luc Rullier, CEA</i>	
THC08	Recent Results from the FEL-Driven Two-Beam Accelerator Project at CESTA.....	872
	<i>Jean-Luc Rullier, CEA</i>	
THC09	Analysis of Longitudinal Bunching in an FEL-Driven Two-Beam Accelerator.....	875
	<i>Jean-Luc Rullier, CEA</i>	
THC10	RF System Upgrades to the Advanced Photon Source Linear Accelerator in Support of the FEL Operation.....	878
	<i>Terry Smith, ANL</i>	
THC11	SLAC Linac RF Performance for LCLS.....	881
	<i>Ron Akre, SLAC</i>	
THC12	No Paper Available	
THC13	Results on Plasma Focusing of High Energy Density Electron and Positron Beams	884
	<i>Johnny S.T. Ng, SLAC</i>	
THC14	Collective Acceleration of Ions by Means of Plasmoids in RF Wells of Frequency-Modulated Laser Field.....	887
	<i>Stanislav Vinogradov, MRTI</i>	
THC15	No Paper Available	

THC16	A 15-MeV Linear Electron Accelerator-Based Source of Tunable Monochromatic Hard X-Rays	890
	<i>Wim Mondelaers, Department of Subatomic Radiation Physics, Ghent University</i>	
THC17	Phase Rotation, Cooling and Acceleration of Muon Beams: A Comparison of Different Approaches	893
	<i>Alessandra Lombardi, CERN</i>	
THC18	RF Cavities for the Muon and Neutrino Factory Collaboration Study	896
	<i>Al Moretti, FNLA</i>	
THC19	High-Brightness Beams from a Light Source Injector: The Advanced Photon Source Low-Energy Undulator Test Line Linac	899
	<i>G. Travish, ANL</i>	
THD01	No Paper Available	
THD02	TRASCO RFQ	902
	<i>P Pisent, INFN-LNL</i>	
THD03	Main Steps for the Fabrication of IPHI RFQ	905
	<i>Michel Painchault, CEA</i>	
THD04	Analysis of Thermally Induced Frequency Shift for the Spallation Neutron Source RFQ	908
	<i>Steve Virostek, LBNL</i>	
THD05	Fabrication and Testing of the First Module of the SNS RFQ	911
	<i>Alessandro Ratti, LBNL</i>	
THD06	Industrial Fabrication of Medium-Beta SCRF Cavities for a High-Intensity Proton Linac	914
	<i>Jozef Kuzminski, General Atomics</i>	
THD07	Structural Analysis of Superconducting Accelerator Cavities	917
	<i>Dale Schrage, LANL</i>	
THD08	Superconducting Accelerating Structures for a Multibeam Driver Linac for RIA	920
	<i>K.W. Shepard, ANL</i>	
THD09	Efficient Design Scheme of Superconducting Cavity	923
	<i>Sang-ho Kim, ORNL</i>	
THD10	Superconducting H-mode Structures for Medium-Energy Beams	926
	<i>Ralf Eichhorn, GSI</i>	
THD11	A Superconductive, Low-Beta Single-Gap Cavity for a High Intensity Proton Linac ...	929
	<i>Alberto Facco, INFN</i>	
THD12	Meander-Line Current Structure Development for SNS Fast Chopper	932
	<i>Sergey Kurennoy, LANL</i>	
THD13	Status of the RFD Linac Structure Development	935
	<i>Donald A. Swenson, Linac Systems</i>	

THD14	Development of Rebunching Cavities at IAP <i>Kai Uwe Kuhnel, IAP, Frankfurt</i>	938
THD15	Design of 11.8-MHz Buncher for ISAC at TRIUMF <i>Amiya Mitra, TRIUMF</i>	941
THD16	High-Power Testing of the APT Power Coupler <i>K. C. Dominic Chan, LANL</i>	944
THD17	Status of Superconducting RF Linac Development for APT <i>K. C. Dominic Chan, LANL</i>	947
THD18	Studies of Coupled Cavity Linac (CCL) Accelerating Structures with 3-D Codes..... <i>George Spalek, General Atomics</i>	950
THD19	Bridge Coupler for APT <i>George Spalek, General Atomics</i>	953
THD20	The Use of Dispersion-Strengthened Copper in Accelerator Designs <i>Robert Valdiviez, LANL</i>	956
THD21	Applications of Superconducting RFQ Linear Accelerators <i>Andrea Pisent, INFN- Laboratori Nazionali di Legnaro</i>	959
THD22	The IH-7-Gap Resonators of the Munich Accelerator for Fission Fragments (MAFF) Linac <i>Alwin Schempp, IAP, Frankfurt</i>	962
THE01	The Spallation Neutron Source (SNS) Linac RF System <i>Michael Lynch, LANL</i>	965
THE02	The RF source of the 60-MeV Linac for the KEK/JAERI Joint Project..... <i>Shigeki Fukuda, KEK</i>	968
THE03	Simulation of Returning Electrons from a Klystron Collector <i>Zhigao Fang, KEK</i>	971
THE04	Lifetime Testing 700-MHz RF Windows for the Accelerator Production of Tritium Program..... <i>Karen Cummings, LANL</i>	974
THE05	The RF-System of the new GSI High-Current Linac HSI <i>Gerald Hutter, GSI</i>	977
THE06	High-Power Circulator Test Results at 350 MHz and 700 MHz <i>William Roybal, LANL</i>	980
THE07	Testing and Implementation Progress on the Advanced Photon Source (APS) Linear Accelerator (Linac) High-Power S-Band Switching System <i>Arthur Grelick, ANL</i>	983
THE08	RF, Thermal, and Structural Analysis of a High-Power CW RF Window <i>Thomas Schultheiss, Advanced Energy Systems</i>	986
THE09	Development of High Power CW RF Windows..... <i>Michael Cole, Advanced Energy Systems</i>	989

THE10	3-D Design of the IPHI RFQ Cavity 992 <i>Pascal Balleyguier, CEA</i>
THE11	Progress on the 140-kV 10-Megawatt Peak, 1-Megawatt Average Polyphase Quasiresonant Bridge, Boost Converter/Modulator for the Spallation Neutron Source (SNS) Klystron Power System 995 <i>William Reass, LANL</i>
THE12	Collector Failures on 350-MHz, 1.2-MW CW Klystrons at the Low-Energy Demonstration Accelerator (LEDA) 998 <i>Daniel Rees, LANL</i>
THE13	A Chopped Electron Beam Driver for H-Type Cavities 1001 <i>Stefan Setzer, Darmstadt University of Technology</i>
THE14	No Paper Available
THE15	Continued Monitoring of the Conditioning of the Fermilab Linac 805-MHz Cavities 1004 <i>Elliott McCrory, FNAL</i>
THE16	No Paper Available
THE17	A Compact Waveguide-Type Cavity Input Coupler for Shielding a Ceramic Window and Balanced Aperture Fields..... 1007 <i>Yoon Kang, ANL</i>
THE18	Investigation of Twisted Waveguides as Slow Wave Structures..... 1009 <i>Yoon Kang, ANL</i>
THE19	Fast RF Ferrite Phase Shifter for High-Power Applications 1012 <i>Yoon Kang, ANL</i>
THE20	Advanced Copper Lining for Accelerator Components 1015 <i>Hiroshi Ino, Mitsubishi Heavy Industries, Ltd.</i>

Friday, August 25, 2000

Invited Talks

FR101	Multiple-Charge Beam Dynamics in an Ion Linac..... 1018 <i>Peter Ostroumov, ANL</i>
FR102	CW Performance of the TRIUMF 8-Meter Long RFQ for Exotic Ions 1023 <i>Roger Poirier, TRIUMF</i>
FR103	Linac Architecture for High Power Proton Sources..... 1028 <i>Jean-Michel Lagniel, CEA</i>
FR201	Commissioning of the 1.4-MeV/u High-Current Heavy-Ion Linac at GSI..... 1033 <i>Winfried Barth, GSI</i>

FR202	Why Accelerator-Driven Transmutation of Wastes Enables Future Nuclear Power?	1038
	<i>Waclaw Gudowski, Technical University Sweden</i>	
FR203	The Spallation Neutron Source: A Powerful Tool for Materials Research	1043
	<i>Thomas Mason, ONL</i>
