

What's been happening?

- Presentation at FNAL PAC meeting in April for CAL/Muon TB resulted in a very positive invitation from FNAL directorate
 - A planning document for CAL TB submitted in Feb.
 - CALICE MOU writing begun
- Additional resources are being invested into MTBF
 - Beam line improvements have been made in the past several months
- Fermilab shut down schedule to finalize soon
- Use of CERN PS and SPS investigated

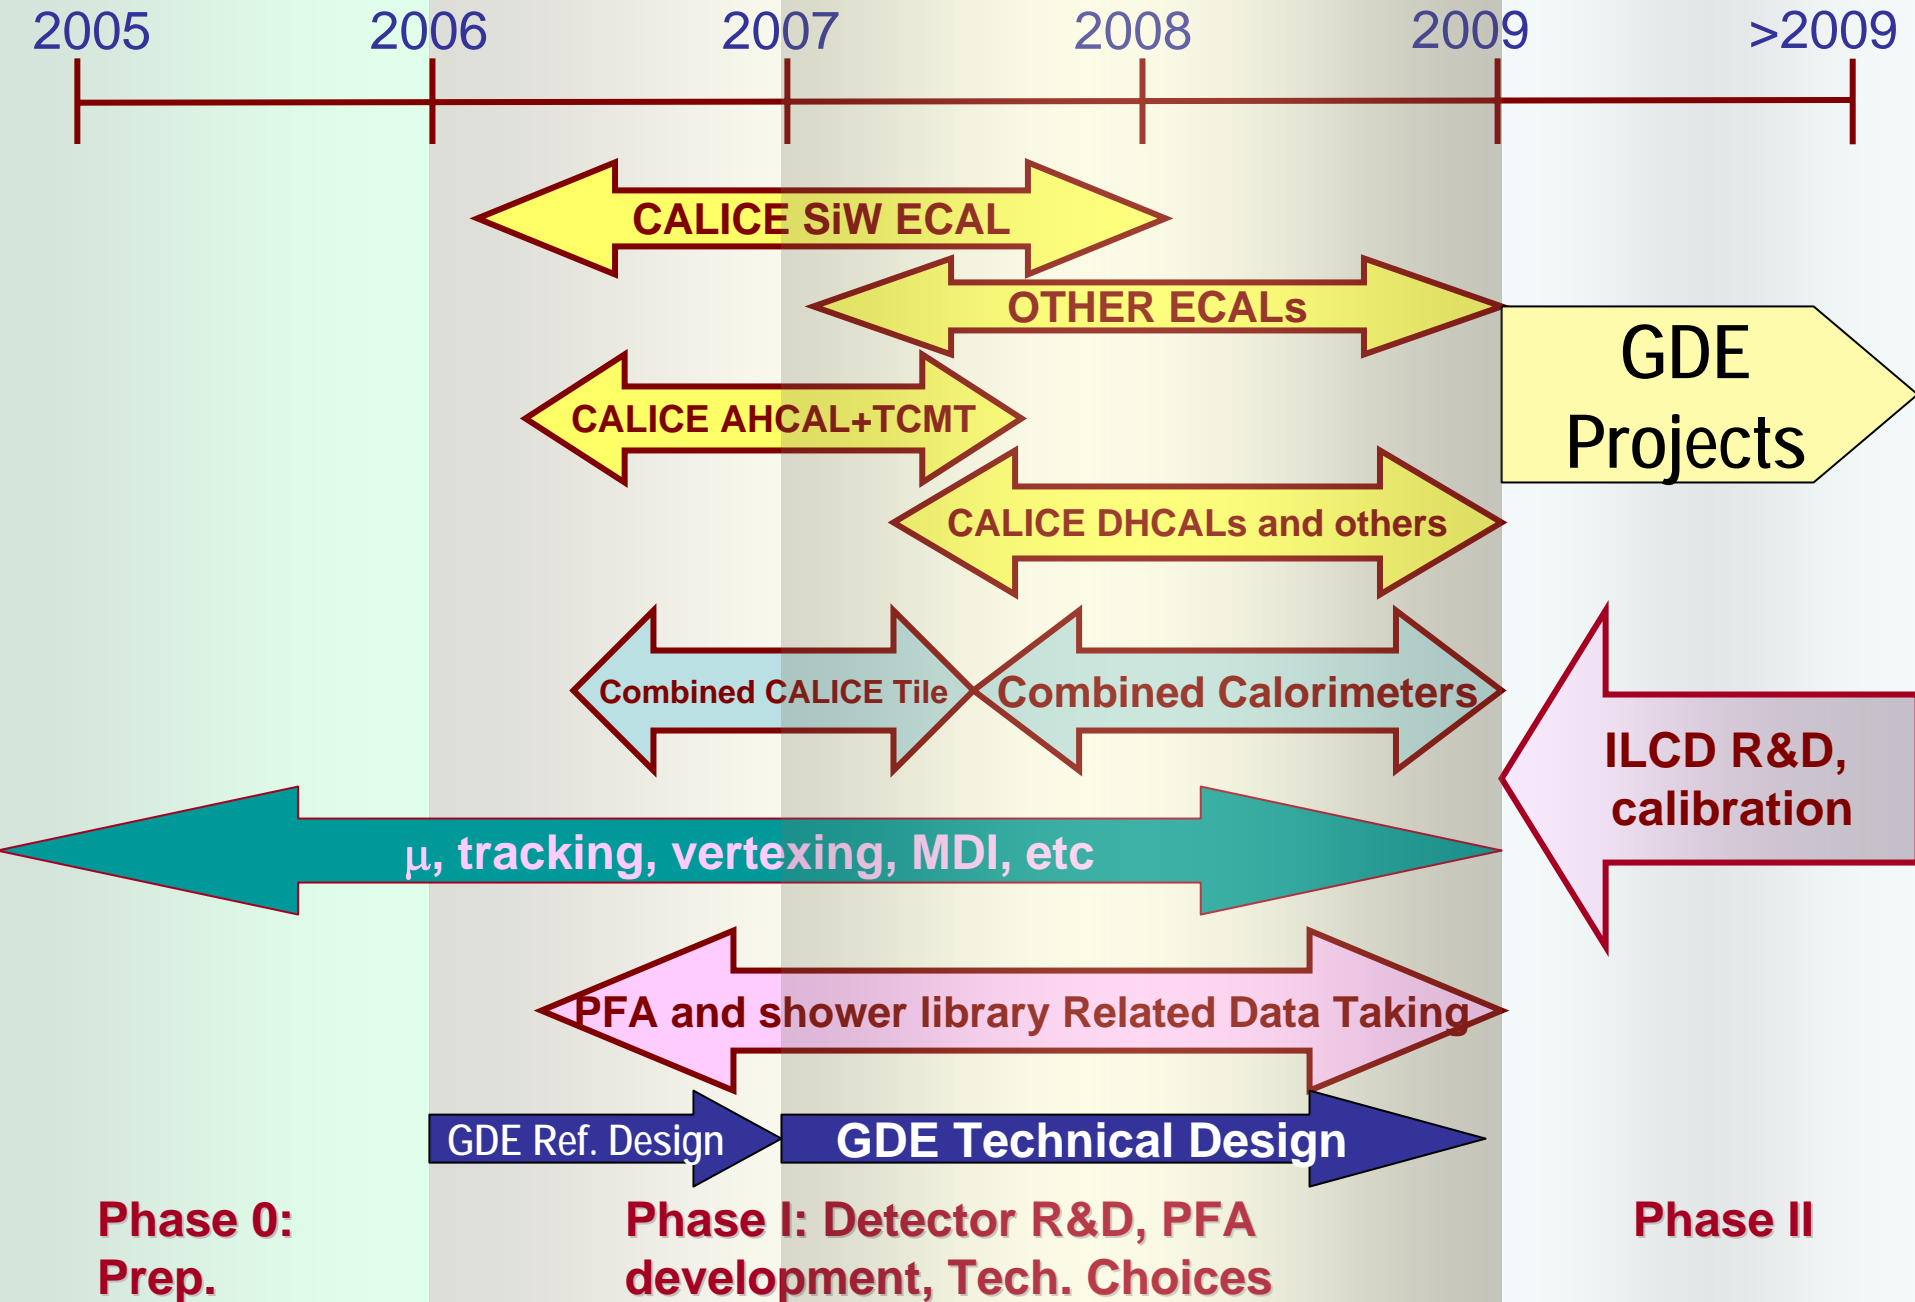

What's been happening?

- Detector TB plans are being crystallized
- Calorimeter groups making progress toward meaningful beam tests
 - CALICE prototype constructions in progress
 - Asian scintillator-W ECAL TB runs expected in 2007 at Fermilab
- Tracking and Vertex groups' needs being documented
 - Massimo Caccia and David Bailey

The GDE Plan and Schedule

Timeline of Beam Tests

Coordination and Timing

- WW TB Coordination efforts
 - Regional TB contacts
 - Europe: F. Sefkow & V. Vrba
 - Asia: K. Kawagoe
 - North America: G. Fisk and J. Yu
 - Have been meeting regularly every 6 weeks for coordination since LCWS2005 at SLAC
 - Important for you to keep the regional contacts up-to-date on your plans and activities
- Funding efforts
 - EUDET proposal for European test beam infrastructure successful
 - US Calorimeter groups' MRI proposal for testbeam not awarded
- Time line for CDR and TDR is laid out in the GDE context
 - The target is 2009 for ILC and so should be for the detectors
