

StreamDevice: longout Records

Normal Operation

The variable x stands for the written or read value.

DOUBLE format (e.g. %f):

Not allowed.

LONG format (e.g. %i):

Output: $x=VAL$

Input: $VAL=x$

ENUM format (e.g. %{}):

Output: $x=VAL$

Input: $VAL=x$

STRING format (e.g. %s):

Not allowed.

Initialization

During initialization, the `@init` handler is executed, if present. All format converters work like in normal operation.
