Millimeter-Wave Drivers for Future Linear Colliders

David H. Whittum
Stanford Linear Accelerator Center, Stanford University, Stanford California, 94309

Abstract

The challenges for high-gradient mm-wave driven colliders are reviewed. Requirements on power sources are examined, and a particular tube is considered for illustration. Research topics relevant to a compact 1 GeV linac are noted throughout.

Extended Abstract for Invited Talk at the 22nd International Conference on Infrared and Millimeter Waves

Wintergreen, Virginia, 20-25 July 1997
