Add draft backup paragraph re Cathie.

Add link to forthcoming vendors page + small edits.

Resynch mods with production SLAC Home Page, modified by Galic.

("Let me search" added to Seminars; text in Bulletin Boards changed from "anytime" to "let me search"; changed "anytime" text to "this year" in Seminars and ACREPORT to synch with Galic's changes to HTML).

Update Stanford U link from Gopher to the new WWW page, in which their Gopher is included.

Update Stanford Medical School link to their new WWW page; simplify Stanford Campus link to their new WWW page.

FPEJMW: add vendors link, resynch with production SLAC Home Page, update Stanford links from Gopher to WWW, replace BITNET with CREN link, add links to USGS, federal gophers. Small edits.

FUTURES: Add link to federal NIH gopher and make LC conference an item.

GRABBAG: Move Vendors section to VENDORS; add MSU links to Weather item; add NASA Hot Topics link; add items on say, PARC map viewer, Berkeley subway (and gather in related links, Expo and HCC); update NFS link. Add pointers section.

SECURITY: Add CIAC item re RAC, update ESnet link to Gopher, edit.

VENDORS: Create, starting by moving Vendors section from GRABBAG, from Keith Jobe's request to add MATLAB vendor. Also add IBM RS/6000-AIX server (from RAC) and EIT items.

See logs at end of each file for more details.

Create new subsection (after ;) in Professional Societies and add first member, HEPIX link.

Try out link to Nina's entire, updated "Brief History of SLAC" (.ps from Addis).

Iterate format a tad.

Fix typo.

Shorten signature link output (go to "using qspires").

Fix blank in "Brief History".

Apparently I can't get rid of the leading blank when "outside link in MidasWWW or xmosaic, at least.

Midas isn't showing my bold with tt. Try different order of tags in one instance.

Order test made no difference.

Test again <b> without <tt>. (Did I really see the updated page?

<b> is working in Midas in the SLAC Home Page.)

<b> without <tt> does bold in MidasWWW. I infer I didn't actually see the updated page last test.

Add new "hot topic" to beginning, this time with link to Drell report on recommendations for future US particle physics.

Iterate Hot Topic text re Pat Kreitz and myself. N.B.: link info came from Harvey Galic!

Will joining the Drell anchor line into one get rid of blank in
"The Drell...?"

This is all the log from the Test SLAC Home Page (SLAC HTML on WWWTEST 192) except for the things still being tested, removed from SLAC HTML in an attempt to improve performance re TonyJ.

Remove the bulk of the logging comments from here to related file SLACHTMLLOG to, one hopes, improve performance re TonyJ. I left the most recent that are still actively being tested.

Joining the Drell anchor into one line did not remove the
"The Drell..." space between the first " and T. In xmosaic, there's a space; in MidaSWWW, there's only a linebreak. Both lead to weird displays.

Fix URL (add missing ' ', del default :70 and :80 ports, change slacvm to www-slac for change management).

Add first level table of contents re discussion with RAC and towards discussion at WWW Tech Committee yesterday. Add link to new page-design playpen page re discussion with PAK and in light of SHP design ferment. (This currently links to RAC's test SLAC Home Page and mine [the official one on WWWTEST], and to my draft WWW SLAC page template.) Try out twisting <h6> into footnote duty. (Get desirable small font but note inappropriate bold re RAC and Ilse.)

Fix typo?

Remove most "learner" info from Introduction section re discussion with members of the WWW Technical Committee.

Updated server, HTTP, and HTML items with added, updated, and deleted links and text; also updated newsgroup link to comp.infosystems.www.users and updated conference item. Deleted SIG-Web link (failed). Added NASA Web info administration item (by Feinler) and link to Stanford's C. Quinn on the "Corporate Image" for Web pages re RAC.

Iterate text. Add Forms item to NCSA doc on Mosaic for X forms.

Fix typo (updated anchor text but not link...)

Update owner link to current proto-standard.

Iterate text some more.

Update standard PC config link re GJM. (Temporary, need wider access of putting on UNIX. Need to talk with Greg first.)

Add Ilse to staff list to synch with WWW (as needed).
