BLT++ and PTD++

L1 Simulation Workshop
July 24, 2003
anders, Berkeley Lab

• BLT and PTD: input, output and configuration objects → See relevant pages in Valerie’s old talk: “New L1/DCT simulation framework - conceptual problems”

• Short summary:
  – BLT: WIP
    * BLT(z) algo changed two times.
    * BLT mask changed twice (I think).
    * Currently hardcoded in trgDC.
  – PTD: WNSY
    * Nothing has ever changed!
    * LUT i.e. Pt threshold is only configuration object.
