DC50 PCMCIA on the Macintosh
1. You will need to go into the PC exchange control panel and **ADD** the application Photoenhancer
2. Results of pushing the **ADD** button
3. Next put in the DOS suffix `.KDC`

4. Change the Document Type to KDC. You will need to scroll up.
5. Now you can say OK and exit PC exchange the Computer may have to be rebooted to get the change into effect. But from this point on you can look at the slide table from Photoenhancer. You still will see icons with a slash through them (SEE BELOW) on the current version. This will be fixed in the future.
