

PF-2 Questions

- How important are gaps ?
 - between Calorimeter components ?
 - between the Calorimeter and TPC ?
 - does the TPC need to be cylindrical ?
 - does a cylindrical TPC fit inside an octagonal ECal ?
 - how efficiently can the TPC detect backscatters ?
- How to transition from a barrel or octagonal TPC to the endcap Ecal ?
- Is the current scheme of a long barrel TPC in front of the end cap optimal ?
