

## TABLE OF CONTENTS

<b>Preface .....</b>	<b>i</b>
<b>National Organizing Committee.....</b>	<b>vii</b>
<b>Scientific Program Committee.....</b>	<b>vii</b>
<b>Working Groups and Conveners.....</b>	<b>vii</b>
<b>Timetable.....</b>	<b>viii</b>
<b>Posters.....</b>	<b>xiv</b>
<b>WG 1- Neutrino Oscillation Physics</b>	
<b>Atmospheric neutrinos: Status and prospects.....</b>	<b>1</b>
<b>Results and Prospects from T2K.....</b>	<b>11</b>
<b>Stopping pion experiments in the sterile neutrino field.....</b>	<b>21</b>
<b>Status of atmospheric neutrino oscillation measurements in IceCube and PINGU .....</b>	<b>31</b>
<b>RENO &amp; RENO-50.....</b>	<b>41</b>
<b>Flavor-Universal Expressions of Neutrino Oscillation Probabilities in Matter.....</b>	<b>51</b>
<b>Last results from Double Chooz.....</b>	<b>61</b>
<b>DUNE Physics .....</b>	<b>70</b>
<b>MeV gauge boson and secret interaction of sterile neutrinos .....</b>	<b>80</b>
<b>Probing Neutrino-Scalar Couplings .....</b>	<b>85</b>
<b>Sensitivity of CP Majorana phases using the synergy between cosmological and neutrinoless double beta decay data at high precision era of measures .....</b>	<b>90</b>

<b>The impact of neutrino decay on medium-baseline reactor neutrino oscillation experiments .....</b>	<b>95</b>
<b>Baksan Experiment on Sterile Transitions (BEST) .....</b>	<b>100</b>
<b>Can Neutrinos Decay? .....</b>	<b>105</b>
<b>The Angra neutrino experiment .....</b>	<b>110</b>
<b>Revisiting T2KK and T2KO physics potential and <math>\nu_{\mu} - \nu_{\mu}</math> beam ratio .....</b>	<b>114</b>
<b>WG 2-Neutrino Sacttering Physics</b>	
<b>Experimental status of neutrino scattering .....</b>	<b>119</b>
<b>The ANDES Underground Laboratory .....</b>	<b>129</b>
<b>Neutrino Event Generators .....</b>	<b>139</b>
<b>Recent developments in neutrino-nucleus scattering theory .....</b>	<b>149</b>
<b>Status of the Angra Neutrino Project .....</b>	<b>159</b>
<b>Charged Current Quasielastic Analysis from MINERvA .....</b>	<b>165</b>
<b>The BONuS Experiment: New Results and Future Plans .....</b>	<b>173</b>
<b>CC0<math>\pi</math> Results From T2K .....</b>	<b>183</b>
<b>Relativistic description of meson-exchange currents and SuperScaling predictions in charged-current neutrino reactions .....</b>	<b>193</b>
<b>Relativistic Green's Function Model and Optical Potential .....</b>	<b>203</b>
<b>CAPTAIN, NuMI and Low Energy Physics Programs .....</b>	<b>213</b>

<b>Charged current resonant and coherent single meson production results from T2K (on and off-axis).....</b>	<b>221</b>
<b>Pion and Kaon Production at MINERvA .....</b>	<b>231</b>
<b>Neutrino-induced meson productions in resonance region .....</b>	<b>241</b>
<b>QRPA-based calculations for neutrino scattering and electroweak excitations of nuclei .....</b>	<b>251</b>
<b>Correlations in neutrino-nucleus scattering .....</b>	<b>261</b>
<b>Coherent elastic scattering between neutrinos and nuclei .....</b>	<b>271</b>
<b>Understanding CCQE events in MicroBooNE .....</b>	<b>276</b>
<b>QCD dynamic effects in the neutrino absorption by the Earth's interior at IceCube neutrino energies and above .....</b>	<b>281</b>
<b>Computation of atmospheric neutrino production .....</b>	<b>286</b>
<b>WG 3-Accelerator Physics</b>	
<b>Fermilabs Neutrino Beamlines, a Short History and the Current Status .....</b>	<b>291</b>
<b>The status of nuSTORM and its production of non-conventional <math>\nu_{\mu}</math> beams .....</b>	<b>301</b>
<b>The European Spallation Source Neutrino Super Beam for CP Violation discovery .....</b>	<b>311</b>
<b>Prospects for Precision Neutrino Cross Section Measurements .....</b>	<b>320</b>
<b>MICE Demonstration of Ionization Cooling .....</b>	<b>330</b>
<b>Neutrinos from Plon Beam Line, nuPIL .....</b>	<b>340</b>
<b>MICE: The Trackers and Magnets .....</b>	<b>348</b>

<b>LBNF Neutrino Beam .....</b>	<b>358</b>
<b>A non-conventional neutrino beamline for the measurement of the electron neutrino cross section .....</b>	<b>368</b>
<b>Studies on pion/muon capture at MOMENT .....</b>	<b>378</b>
<b>Cosmological bounds of sterile neutrinos in a <math>SU(3)_C \otimes SU(3)_L \otimes SU(3)_R \otimes U(1)_N</math> model as dark matter candidates .....</b>	<b>388</b>
<b>Progress on Cherenkov Reconstruction in MICE .....</b>	<b>393</b>
<b>WG 4-Muon Physics</b>	
<b>Connections between <math>g - 2</math>, EDMs, CLFV and LHC .....</b>	<b>398</b>
<b>Update on the AICap Experiment .....</b>	<b>408</b>
<b>An Overview of the COMET Experiment and Its Recent Progress ....</b>	<b>418</b>
<b>Searches for Charged Lepton Flavor Violation with the ATLAS Detector at the LHC .....</b>	<b>428</b>
<b>The Muon <math>g - 2</math> Experiment at Fermilab .....</b>	<b>438</b>
<b>The Mu2e Experiment at Fermilab .....</b>	<b>449</b>
<b>The MuLan Experiment: Measuring the muon lifetime to 1 ppm .....</b>	<b>460</b>
<b><math>g-2</math> J-PARC (E34) .....</b>	<b>471</b>
<b>Recent results on lepton flavor violation from CMS .....</b>	<b>481</b>
<b>Allowed rare pion and muon decays as tests of the Standard Model</b>	<b>491</b>
<b>Search for the decay <math>\mu^+ \rightarrow e^+e^-e^+</math> .....</b>	<b>501</b>
<b>The Multiple Muon Charge Ratio in MINOS Far Detector .....</b>	<b>509</b>

<b>Development of Muon LINAC for the Muon g-2/EDM Experiment at J-PARC .....</b>	<b>514</b>
<b>Forbush event detected by CARPET on 2012 March .....</b>	<b>519</b>
<b>List of Participants.....</b>	<b>524</b>
