

Conference Proceedings

Cavendish Conference Centre
London, United Kingdom
19–21 December 2018

Invited Talks

I. Brivio (Niels Bohr Institute & Heidelberg University)	4
<i>The Neutrino Option</i>	
T. Dealtry (Lancaster University)	14
<i>Hyper-Kamiokande</i>	
P. Di Bari (University of Southampton)	23
<i>Neutrino masses, leptogenesis and dark matter</i>	
Y. Gando (Tohoku University)	37
<i>Neutrinoless double beta decay search with liquid scintillator experiments</i>	
S. King (University of Southampton)	46
<i>Theory Review of Neutrino Models and CP Violation</i>	
V. Kozhuharov (INFN-LNF & Sofia University)	60
<i>Search for heavy neutrinos at CERN SPS</i>	
L. Lyons (Imperial College London & University of Oxford)	70
<i>PHYSTATν at CERN (January 2019)</i>	
A. Smirnov (MPIK, Heidelberg)	77
<i>Neutrino Mixing via the Neutrino Portal</i>	
M. Sorel (IFIC, Valencia)	89
<i>Xenon TPCs for Double Beta Decay Searches</i>	

Poster Presentations

G. Brunetti (INFN, Padova)	100
<i>The ENUBET Beamline</i>	
A. Capolupo (University of Salerno & INFN)	105
<i>Total and geometric phases, Majorana and Dirac neutrinos</i>	
E. Ciuffoli (IMP, CAS)	110
<i>Measuring the Neutron Distribution from Coherent Elastic Neutrino Nucleus Scattering</i>	
E. Drakopoulou (University of Edinburgh)	115
<i>ANNIE Phase I: Neutron Background Measurements</i>	
K. Farrag (QMUL & University of Southampton)	120
<i>Probing 21cm cosmology and radiative neutrino decays</i>	

T. Kärkkäinen (University of Helsinki)	124
<i>Neutrino mass via linear seesaw, 331-model and Froggatt-Nielsen mechanism</i>	
H. Krishnamoorthy (Tata Institute of Fundamental Research)	129
<i>Muon induced neutron measurement setup at TIFR</i>	
G. Lambiase (University of Salerno & INFN)	134
<i>Consequences of Modified Cosmologies in DM abundance and PeV IceCube signals</i>	
I. Maturana-Ávila (Pontificia Universidad Católica de Chile)	138
<i>Towards a way to distinguish between IHDM and the Scotogenic at CLIC</i>	
L. Miramonti (University of Milano & INFN)	143
<i>Recent results on pp-chain solar neutrinos with the Borexino detector</i>	
S. Molina Sedgwick (QMUL & University of Southampton)	148
<i>Matter density profile effects on neutrino oscillations at T2HK and T2HKK</i>	
J. Paton (University of Oxford)	154
<i>Neutrinoless Double Beta Decay in the SNO+ Experiment</i>	
S. Rosauero-Alcaraz (IFT, Madrid)	159
<i>Neutrino-Dark Matter Portals</i>	
M. Tenti (University of Milano-Bicocca & INFN)	164
<i>The ENUBET narrow band neutrino beam</i>	
S. Valder (University of Warwick)	170
<i>Diffuser Research and Development for Optical Calibration Systems in Hyper-Kamiokande</i>	
G. Vandierendonck (Ghent University)	175
<i>Commissioning the SoLid Detector Using Cosmic Ray Muons</i>	
W. Vinning (University of Warwick)	180
<i>The Narrow-beam Diffuser Subsystem of a Prototype Optical Calibration System for the Hyper-Kamiokande Detector</i>
