

Photo Pictures of PMMA Masks Made by Deep X-Ray Lithography

P.J. Chou
April 25, 1997

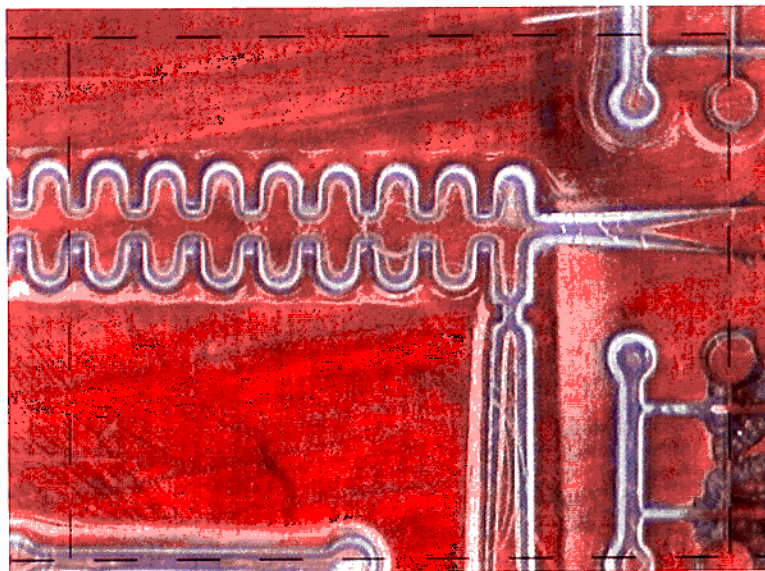

[Sample]

In early April, Joshua Song at Argonne National Lab sent three PMMA masks made by x-ray lithography to Ali Farvid for plating job. The following pictures were taken before they were sent to Ali.

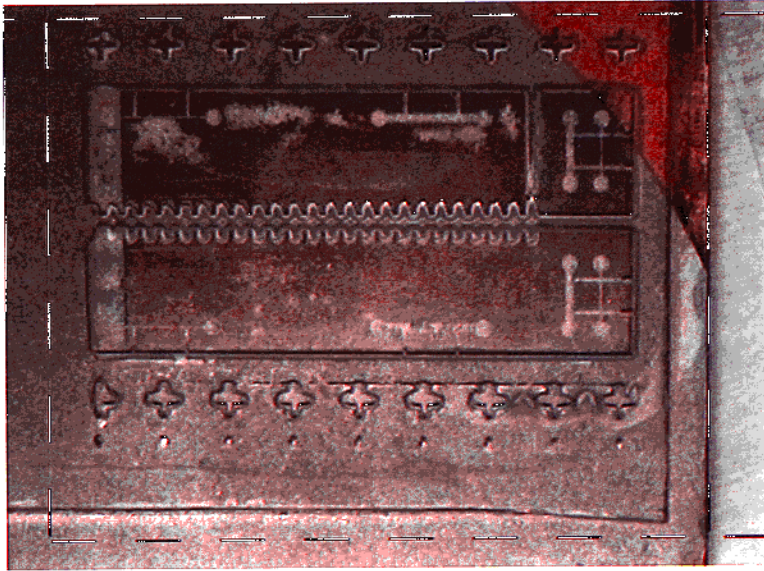

- scan211.tif= the PMMA mask for the longest structure(~ 60 cells)

- scan208.tif= the blow-up view of scan211.tif, magnification 40X.

- scan212.tif= the PMMA mask of the short structure(~30 cells).

- scan209.tif= the blow-up view of scan212.tif, magnification 40X.
