

M-213

MINUTES OF PROJECT M MEETING NO. 61

Date: August 25, 1960, 4:00 p.m. Thursday
 Place: Room 104, Physics Lecture Hall
 Present: Copenhagen, Eldredge, Cain, Brown, Meloni, Neal, Schrade,
 Loew, Kinst, Gould, Whitson, Crabtree, Helm, Mallory, Jasberg,
 Chu, Prosper, Kraus, Sonkin, Goerz, Pindar, Jespersen, Christie,
 Kirk, Moulton, Ginzton

I. Talk on Manpower

Mr. Copenhagen passed out the manpower section of the Source Book and talked about what it says. It is expected that the manpower figures will be revised from time to time as things become clearer. Please discuss with Mr. Copenhagen the notions you may have about the form and content of the manpower write-up.

II. Name for Project

We should try to settle on a name for the project fairly soon. Many have been suggested in the past, but none is obviously superior. There may be names specifically for the accelerator itself and also for the entire project, or perhaps just one name for the laboratory with the accelerator being called something like "Mark V" or "the big machine". Suggestions are most welcome. Please direct these to Mr. Kirk.

Next Meeting: Thursday, September 1, 1960, same time and place. Mr. Loew will discuss the 2 $\pi/3$ accelerator pipe and compare it with the $\pi/2$ pipes that have been previously used.
