Traffic Flow at Main Gate

Look for changes at the Main Gate to improve safety. Incoming traffic will have the right of way as of Monday, May 24th and stop signs will be installed on the loop road on both east and west sides of the main gate.

Practice Diligence

Bob Cowles of SLAC's Computer Services is asking all of us to be a bit more mindful of our computers nowadays. Recent hackers and viruses at DOE Headquarters and at other labs seem to be proliferating. If you see anything that doesn't seem quite right, report it to the SCS Help Desk.

Office Moves Continue

The latest move is Public Affairs, moving from one end of the ground floor of the Central Lab to the other end, Room 132, closer to the Orange Room. As we reported last week, Tech Pubs has moved to the second floor of the Central Lab and you have no doubt seen the demolition on the first floor. A new set of offices for the incoming Director and staff is scheduled for completion by August 1.

Bike to Work Day

If you need an incentive to bike to work this coming Tuesday, May 18, read on. Register on-line at http://www.rides.org/btwd99 and you will be eligible to win prizes including a trip for two on Southwest Airlines, a Samba Tandem bicycle by Burley, and bike gear. RIDES for Bay Area Commuters is coordinating "Energizer Stations" where cyclists can get free food, drink, and other treats. Some local stations are the Caltrain Station and the San Mateo Drive Bike Bridge in Menlo Park, at Pasteur Drive/Welch Road at Stanford, and at Arastradero/Foothill Expressway in Palo Alto (a complete list of stations can be found on the RIDES web site).

Burke named "Distinguished Alumnus"

In a press release from Purdue University, David Burke was named as a "distinguished alumnus." (Burke got his bachelor's degree from Purdue in 1971.) He was acknowledged for his research in particle physics and for his leadership on the R&D for the Next Linear Collider, as well his work with the DOE's High Energy Physics Advisory Panel from 1995-97.

Women Science Faculty

The MIT study on the shortage of women faculty in the sciences could be a picture of any major university or national laboratory, not just MIT. The foreword to the study says that the absence of
women is not perception, but reality. Read the report at http://web.mit.edu/fnl/women/Fnlwomen.htm

**FleaMarket**

You can post your classified ad using the SLAC FleaMarket Submission form. Current ads can be seen on the FleaMarket web page. These pages can be viewed from computers within the SLAC domain.
