Watch Those Stop Signs!

Reminder that Monday May 24th is the day of the STOP SIGNS at the Main Gate. Starting Monday, incoming traffic will have the right of way, and folks on the Loop Road will have stop signs.

Missing!

This book was taken from the New Books display. If you have seen it, please return it to the library so that other people may borrow it.

QA76 M5 1998
THE FEYNMAN PROCESSOR: Quantum entanglement and the computing revolution.

Hel-LO! TechPubs Has Moved!

For those of you who are still wandering the halls of the first floor of the Central Lab looking for TechPubs, here's another reminder that they are now located on the second floor. And if you have a meeting scheduled for the Orange Room over the next couple of months, and you want a quiet atmosphere, better change rooms now. Construction may be noisy.

Lehman Review Next Week

Staff involved with the next-generation linear collider will be put through their paces next week during the Lehman Review. Presentations will be made to the committee regarding the status of the R&D of the NLC. Meetings will be held in the Orange Room, and let's keep the construction noise down!

Menlo Stats

In a recent discussion with Menlo Park's City Manger, Jan Dolan, the topic was affordable housing. It seems that the average income for Menlo residents is just under $50k a year and the average house is just over $500k. "The City is worried, too, because just like you, we can't hire staff who can afford to live here, or even commute here." One solution is higher density housing, something that raises hackles among some long-term residents.

No Time Limit to Learning

Ask Sharon Haynes who has completed a Bachelor's degree after 38 years. "Life just kept getting in the way!" jokes Haynes. She now holds a BS in the area of Health and Human Services.
Administration from The College of Notre Dame in Belmont. "After attending graduations for all my family and friends, I finally had a graduation of my own!"

And Now for the Sports Update

Team Four in the SLAC Bowling League showed more spunk than Avis-over-Hertz when they jumped into first place after last week's final game. Team members are Skip Ethier, Obie Leung, Juliette Kirkendoll and Crystal Tilghman. The second place team was Kris Barlowe, Becky Limones, Rod Curry and Steve McKee. In third place were Barbara and Clark Ebel, Henry and Judy Heinrich. The SLAC bowlers were pleased with their season but fear it may be the last unless they can recruit more members. Contact Crystal Tilghman x2677 to sign up for next season.

Better Protection for Your Money

If you need an armored car for all your bowling earnings or other loot, this message is for you. DOE's Idaho National Engineering and Environmental Laboratory is working to make the armored vehicles of the future lighter and more maneuverable, using an "atomization" process. Researchers are creating composite steel alloy powders that exhibit extreme hardness and create thinner armor that also has superior ballistic performance and better molding. Whew! There was no comment regarding research on the common cold.

FleaMarket

You can post your classified ad using the SLAC FleaMarket Submission form. Current ads can be seen on the FleaMarket web page. These pages can be viewed from computers within the SLAC domain.
