June 11, 1999
P.A. Moore, Director's Office

This Weekend at SLAC

On Friday we have the visit by the Secretary of Energy and his All Hands talk at 2 PM. All Staff are invited to attend. On Saturday Stanford Campus is holding commencement activities and as part of those festivities, there will be tours of SLAC for friends and families of graduates. Keep that in mind if you are planning to come to work. Then on Sunday SLAC is the venue for a memorial service for Bob Mozley at 3:30 in the Cafeteria/Breezeway.

Parking

Construction continues apace for the new set of offices for the incoming director and his staff. For those of you who normally park behind the Central Lab, there will be six or so spaces reserved for contractors for the next couple of months during construction.

Controlled Burn

To reduce the risk of wild fires, the Jasper Ridge Biological Preserve, in cooperation with the California Department of Forestry (CDF), the Palo Alto Fire Department, and the Woodside Fire Protection District will conduct a controlled burn sometime between June 28 - July 1. The exact date will depend on weather conditions and safety precautions. Burning will be conducted between 7:00 A.M. and 3:00 P.M. Questions should be directed to the Jasper Ridge Biological Preserve at 650-723-1589.

Fly Free

SLAC's Don McShurley volunteers his time to help youngsters find out what it's like to fly an airplane. An upcoming event is on Saturday, June 12 at Moffett Field but the program continues on a regular basis. The offer is open to any child ages 8-17 as part of the Young Eagles Program. Contact Don at x2883 or visit the web site at www.eaa62.org.

Possible Phone Disruption This Weekend

New cable systems were installed for Building 40 and part of Building 44. We will be cutting over telephone lines in those buildings beginning on Saturday, June 12, at 9:00 a.m. The work will continue throughout the day on Saturday and also on Sunday, June 13. Most users will not have any disruption to their telephone service, but some users may have a momentary loss of dial tone or disconnection of a call in progress. Direct questions to Brenda. Eberle x2321.

Summer Pests

With fine weather come pests, and with pests come illnesses. Recently the SLAC Medical Department cared for a SLAC worker who found a number of ticks on himself after working
outdoors. The tiny western black-legged tick can carry the Lyme-disease organism. To prevent tick bites, avoid areas where tall grass and low-lying shrubs or trees can rub against the lower body. (SLAC gardeners, take note!) Call the Medical Department x2281 for questions about tick removal, as well as the vaccines and treatment for Lyme disease. For more information about ticks found in California, see http://entomology.ucdavis.edu/faculty/rbkimsey/caticks.html.

FleaMarket

You can post your classified ad using the SLAC FleaMarket Submission form. Current ads can be seen on the FleaMarket web page. These pages can be viewed from computers within the SLAC domain.
