580 Miles to LA and Back

Rich Dominiak had a great time with California AIDS Ride 6 and will be sharing pictures and stories, Tuesday, July 6, 1999 at 12:00 noon in the Training and Conference Center, side C&D. All are welcome.

Welcome to New Tech Pubs Manager

Pattie Myers joined us on Monday and is located in Room G200. Her extension is 4137 and email is pmyers. Stop by and say hello if you get a chance. Pattie is no stranger to Sand Hill Road as her previous employer was our next door neighbor Addison Wesley.

Congratulations

Eleanor Mitchell has been named as Jonathon Dorfan’s executive administrative assistant and she will take up the job starting in August. She’s been at the lab for six years and currently is working for Greg Loew. "Greg has been a great mentor, and I'll miss working with him on a daily basis. I'm very enthusiastic about being a member of the team working with Jonathan. I'm inspired by his exciting new goals for the lab,” says Mitchell.

Summer Soaps

During your busy travel season this summer, do a good deed and bring home some of those hotel-sized shampoos and soaps. This year’s designated charity is the Boys and Girls Club of Menlo Park. Donations may be left with the Travel Office in the A&E Building or with P.A. Moore in the Central Lab.

Construction Update

If you’ve been in the Central Lab lately, you’ll see that the sheet rock has gone in and there are now clearly delineated rooms. The new suite of offices will house a conference room, kitchen, copy room, and offices for the Director, Deputy, Research Director, and administrative staff. The move in date is still on schedule for the first week of August.

Early Bird Gets the Parking Next Two Weeks

The SLAC Summer Institute starts on July 7th and continues until the 16th. The topic this year is *CP Violation: In and Beyond the Standard Model*. Sessions will be held in the auditorium and will impact the lobby, breezeway, and picnic area.

Controlled Burn Went Smoothly
Folks at Jasper Ridge report that the controlled burn was a success. The next step is a follow up mailing to be sent to local area residents asking for feedback on the process. Some residents expressed concerns about the impact on wildlife. Most available evidence suggests that a controlled burn actually enhances the number, diversity, and condition of invertebrates and vertebrates, as well as native vegetation. Questions can be directed to Philippe Cohen at philippe@jasper.stanford.edu.

**FleaMarket**

You can post your classified ad using the SLAC FleaMarket Submission form. Current ads can be seen on the FleaMarket web page. These pages can be viewed from computers within the SLAC domain.
