EPAC and HEPAP at SLAC

It’s committee time at the Lab. The Experimental Program Advisory Committee has presented five exciting new projects, four of which are fixed target experiments and one that would involve PEP II. As for the High Energy Physics Advisory Panel, there were two main considerations: hearing from the HEP labs about budgets, then continuing work on the “white paper” which will serve as a background paper (and more) for the next administration.

Drell Wins Fermi Award

President Clinton named Sidney Drell as a winner of the Enrico Fermi Award, given for a lifetime of achievement in the field of nuclear energy. Dr. Drell will receive the award for his contributions to arms control and national security and to particle physics. Also named were Sheldon Datz, Oak Ridge National Laboratory, for his pioneering research in atomic and chemical physics and Herbert York, emeritus director of the University of California’s Institute on Global Conflict and Cooperation for his efforts for nuclear deterrence and arms control agreements. See

Web History Cites SLAC

In their recently published book, How the Web was Born (Oxford University Press), Robert Cailliau and James Gillies of CERN document SLAC's establishment of the first U.S. Web site. The book also contains numerous interesting anecdotes about the SLAC WWW Wizards - Louise Addis, George Crane, Tony Johnson, Paul Kunz, Bebo White, and Joan Winters.

Laboratory Safeguards and Security

In the survey of the Lab’s Safeguards and Security services that was conducted recently, there were some comments regarding card key access for various buildings on the site. According to Rick Yeager, the primary drawback of computerized card key access is the cost of the equipment and installation, however, there are some stand-alone systems set up (called Omnilock) in some areas which are fairly effective control method. Any questions on this method of access control should be directed to Rick Yeager at ext. 5333.

Holiday Party

Mark your calendar! Check it twice! The Annual SLAC Holiday Celebration is scheduled for December 19 from 11:30 am to 1:30 pm. Enjoy a sumptuous feast of roast turkey, mashed potatoes, cobbler and other delights in the palatial Panofsky Auditorium complex. Santa will be coming to town with candy and raffle prizes for the good SLAC boys and girls. Entertainment is by the Mountain View High School Madrigal Choir.

It’s A Grand Old Flag
And in this case, the “grand old” has been replaced with a “brand new” American flag over the Fire Station. Thanks to Doug Kreitz and Rick Yeager for the replacement.
