SSI Talks Available on Web Site

The 2003 SLAC Summer Institute lectures, pre-lecture notes and talks are now available on the SSI Web site. Click on the lecture schedule or the conference schedule to access the materials. The Proceedings will be available in early 2004.

Understanding Allergies

The SLAC Medical Department is hosting a noon lecture on allergies by Dr. Vincent Marinkovich. He will address the nature of allergic disease and the underlying biological mechanisms, which produce symptoms. The talk will cover allergies involving inhalants (e.g. pollens, cat dander), foods, molds, and discuss the most effective treatments. The event will happen Tuesday, September 16 at noon in the Panofsky Auditorium.

Mars Up Close and Personal

If seeing Mars burning in the southern sky isn't enough, check out these new images from the Hubble Space Telescope. The red planet is making its closest approach to Earth in almost 60,000 years, and the Hubble photos capture the planet in incredible detail. By the way, there's still time to see Mars with your own eyes.
